## EDUCATION

**University of California, Riverside**                                    *Expected 2023*
• B.S. Computer Science, GPA 3.97

## EXPERIENCE

**Nex-ii**                                                                **May-Sep 2020**
*Product Designer*                                                        *Los Angeles, CA*
• Created reusable components in React and Flutter for both web and mobile products.
• Designed a marketing website and B2B ads platform for a startup company, twiine.
• Developed a social media app using Figma and Flutter with a team of 4 mobile engineers.

## PROJECTS

**Calcifer**
• Implemented a Pomodoro Discord bot used by 500+ users.
• Utilized Typescript and the Discord API to parse user messages, cross-reference a user database, and start timers within Discord.
• Created mocks using the Jest to unit test all functions.

**Trieuloo Twitter Tracker**
• Led a team of 3 in building a Twitter bot that tracks League of Legends statistics.
• Designed an algorithm that posts a tweet based on game data retrieved from the Riot Games API.
• Implemented AWS EC2 using FTP to continuously host the bot.

**Dragon Fist Fitness**
• Led a team of 3 in developing a mobile app in Flutter that helps users accomplish fitness goals.
• Implemented Google Firestore database to store user login credentials and workout data.
